## SUMMARY

---

The high-performing individual with a proven ability to establish compatible requirements with User Interface Applications. Highly enthusiastic and dependable front-end and back-end web developing professional with more than three years of developing modern web applications using Angular, ReactJS, NodeJS applications.

## EDUCATION

---

### Computer Programming and Analysis

Sept 2019 – Present

Seneca College, Toronto

#### Award:

President's Honor List Fall 2020, President's Honor List Winter 2021,

President's Honor List Fall 2021,

Bachelor of Tech Software Development Scholarship Fall 2019.

- Programmed web development projects using Node.js, ReactJS, JavaScript (jQuery), CSS (Bootstrap).
- Installation and setup of Oracle SQL Community servers using C/C++, Java application on Windows/Linux.
- Utilized web applications connected to MongoDB server Database.
- designed data structures, algorithms, and object-oriented programming in the exact specification

## TECHNICAL SKILLS

---

Programming	C/C++, C#, Java, HTML, CSS, JavaScript (jQuery), TypeScript, Python
Database	MS SQL, MySQL, Oracle SQL, MongoDB
Frameworks / Tools	Bootstrap, Django, NodeJS, ASP.NET MVC, React JS, Angular, React Native
IDE Tools	MS Office, Eclipse, IntelliJ IDEA, MS Visual Studio, MS Visual Studio Code
Version Control	Git, GitHub, Azure DevOps Server
Case Modeling	Visual Paradigm, Draw.io
Cloud Platform	Azure Web Apps, AWS Elastic Beanstalk, Heroku, Netlify, Google Firebase
Operating System	Windows, Linux/Unix

## ACADEMIC PROJECTS

---

### Server-Side Web applications using Node.js and Express

GitHub: <https://github.com/krouhifar/WebServerProject>

Heroku: <https://fast-castle-87951.herokuapp.com/>

- Created web pages for administrator, user, and visitor's interface.
- Used HTML 5, CSS3, Vanilla JavaScript, NodeJS, Express and the Handlebars templating engine.
- User data access by MongoDB Database, Google-OAuth 2.0 APIs server.

**Web REST API using ReactJS**

GitHub: [krouhifar/Covid-Tracker \(github.com\)](https://github.com/krouhifar/Covid-Tracker)

Firebase Web Hosting: <https://covid19-track.web.app/>

- Open-source JavaScript frameworks and libraries (React, jQuery, Bootstraps, GSAP, and Leaflet).
- The concept (application) of front-end web client development for tracking Covid-19.
- A survey of widely-used current front-end development environments.

## WORK EXPERIENCE

---

**CAP 2 Associate****Sept 2020 – Present**

Walmart, Richmond Hill

- Responsible for the processing of orders and shipments according to company policies and procedures.
- Followed company package/shipping standards ensuring all customers received all online order pickups in excellent condition.
- Determined customer needs by asking relevant questions and listening actively to their response.
- Read and comprehend job orders.
- Trained in picking, sorting, packing, and binning.

**Full Stack App Developer (Internship)****Jun 2021 – Sept 2021**

DoubleClick Lending, Markham

- Researched and built a POC mobile app development by using React Native mobile application.
- Manage application requirement and project coordination through Azure DevOps tools.
- Maintained and administered GIT source code repository through Azure DevOps tools.
- Experienced in working with Angular 10 modules, services, directives, and dependency injection.
- Responsible for creating RESTFUL Web Services to serve data to the front-end application in JSON format.
- Created a custom responsive web application to robust a line-of-business web application using Bootstrap framework.

## Activity and Memberships

---

- Basketball Player.
- CPR and AED First Aid certified.
- Electric Pallet Jack certified.
