Summary

The high-performing individual with a proven ability to establish compatibility with clients. Highly enthusiastic and dependable customer service professional with more than one year of client interface experience.

IT Work Experience

Full Stack Developer | DoubleClick Lending | Toronto, Canada
June 2021 – September 2021

- Designed and created single web page client applications using current modern technologies while optimizing UI/UX content for mobile and cross-browser performance.
- Built new components for site projects using Angular, TypeScript, and TS Lint with DevOps methodology and Azure Cloud services.
- Conceptualized and managed dynamic web pages for data display by increasing 80% complete mobile responsive optimization.
- Collaborated with 3 back-end teams to integrate external APIs into web pages and applications.
- Worked with 8+ teams to manage application requirements and project coordination through Azure DevOps tools.
- Researched and built a POC mobile app using React Native.

Other Work Experience

CAP 2 Associate | Walmart | Toronto, Canada
September 2020 – Present

- Take responsibility for processing orders and shipments according to company policies and procedures.
- Follow company package/shipping standards ensuring all customers receive all online order pickups in excellent condition.
- Determine customer needs by asking relevant questions and listening actively to their response.
- Read and comprehend job orders and trained in picking, sorting, packing, and binning.

Skills

JavaScript	React /Angular/ Node
C#	Jest/Git/AWS
Python	Web Development
TypeScript	REST API/JSON

Personal Projects

Covid-19 Tracker

- Created Covid-19 web-based clone application for tracking the cases in each selected country.
- Used React, Leaflet, Material UI, and GSAP libraries, I was able to make customizable component to navigate and select the desired country.
- Provided the REST API requests to data, so I was able to design the concept of a front-end web application.

Fragment Microservices

- Followed the lightweight model pattern to develop and deploy web services independently.
- Created a secure and deployed user sign-up authentication using Amazon Cognito and EC2 in Node.js environment.
- Implemented Unit Testing in the Development Phase of the CI/CD Pipeline with GitHub Actions.
- Worked with design pattern of in memory database using SQLite.

Education

Computer Programming and Analysis
Seneca College
September 2019 – August 2022
